Componenti Elastici

Co.El. has been successfully operating on the market of springs since 1961. Thanks to its organization and structure, Co.El. guarantees :

- the manufacturing of large as well as of small quantities;
- the adaptability of the final product to different uses and to the customers' requirements;
- the certification ISO 9001:2008;
- SPC certificate.

Quality System Certified

Componenti Elastici

# COMPRESSION SPRINGS

Can be cylindrical, conical and biconical, with approached, open, ordinary or ground endings, right or left winding.

Componenti Elastici

# EXSTENSION SPRINGS

Can have German or English eyebolts whose length can be adapted to the customers' needs.

Componenti Elastici

# TORSION SPRINGS

Have terminal shanks with folds that make springs suitable to different uses: locks, household articles, the mechanics and the textile field.

Componenti Elastici

# DOUBLE TORSION SPRINGS

Join two torsion springs together.  
Thanks to their compactness and facility of  
assembling, they are easily employed in lighting  
systems, sport equipment and motor vehicles.

Componenti Elastici

# BENT WIRE SPRINGS

Thanks to the variety of their shapes and working systems, these springs can be used in many different fields.

Componenti Elastici

# STRIP SPRINGS

Can be bent, sheared and funnelled,  
automatically or manually, depending on the  
amounts required.

Componenti Elastici

# SPRINGS FOR LIGHTING SYSTEMS AND HANDLES

Co.El is specialized in these fields, where particular attention must be paid not only to functionality but also to beauty. Our products are manufactured to reconcile both.

Componenti Elastici

These were some examples of our products.
